PROFESSIONAL SUMMARY

BSIT student with hands-on experience in web development, database management, and basic object detection. Familiar with HTML, CSS, JavaScript, SQL, PostgreSQL, Git/GitHub, PHP/Laravel, and Python. Interested in building practical and user-focused technology solutions while continuously developing technical skills.

TECHNICAL SKILLS

Web Development: HTML, CSS, JavaScript, PHP, Laravel

Database: SQL, PostgreSQL, Database Design

Programming: Python

Tools: Git, GitHub, GitHub Pages

Other: YOLOv5 Object Detection

PROJECTS

Personal Portfolio Website

- Developed and deployed a static portfolio website using HTML, CSS, and JavaScript. Published the project through GitHub Pages and organized project information for online presentation.

Web Development Project

- Created a web development project using HTML, CSS, and JavaScript and maintained the source code through GitHub.

PostgreSQL Database Projects

- Designed and worked with relational databases using PostgreSQL, including tables, queries, indexes, views, materialized views, transactions, and triggers.

Online Store Database

- Designed a relational database for an online store with customers, products, orders, and order items, including SQL queries for retrieving and analyzing data.

YOLOv5 Object Detection

- Set up a YOLOv5 object-detection environment and worked with webcam-based detection, with plans to train the model using custom object images.

Community Web System

- Proposed a community web system for a homeowners association to manage announcements, emergency alerts, complaints, and facility-related information.

EDUCATION

Polytechnic University of the Philippines – Calauan Campus

Bachelor of Science in Information Technology (BSIT) — 3rd Year

Liceo de Calauan

Senior High School — STEM Strand, 2023–2024

Dayap National High School – Main Campus

2018–2022
